UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF AGRICULTURAL ECONOMICS
WASHINGTON, D. C.

March, 1944

FARM PRODUCTION AND INCOME OF TURKEYS, 1942-43 1/

Production of turkeys in 1943 was 32,565,000 birds, about the same as in 1942 -- 22 percent above the 10-year (1932-41) average, and 7 percent above the 5-year (1937-41) average. Production was up in 20 States, down in 23 States and showed no change in 2 States.

For the first time California led all States in the production of turkeys with a total of 3,670,000 birds. Texas was second with 3,639,000 followed by Minnesota with 2,960,000. The West and West North Central groups of States each produced 30 percent of the Nation's turkeys in 1943, the South Central 17 percent, the East North Central 9 percent, and the South Atlantic and North Atlantic 7 percent each.

Larger Consumption by Producers: Producers of turkeys consumed 1,180,000 birds in 1943 -- 3.6 percent of the number produced. This was more than in 1942, by 43,000 birds or 4 percent. Turkey producers usually consume fewer birds when the price is high and a larger number when the price is low. However, because of the shortage of red meat, and in spite of the fact that turkey prices were 19 percent above those of 1942, producers ate more turkey than in 1942.

Turkey Sales Smaller: About 30,569,000 turkeys were sold from farms in 1943 -- 6 percent less than in 1942. About 2,263,000 birds sold in 1943 were late market birds carried over from 1942 and sold during the first 2 months of the year, while 4,441,000 breeder hens and toms, less deaths during the breeding season were disposed of after the breeding season. Of the 32,565,000 turkeys produced in 1943, about 2,725,000 late market birds, 4,355,000 breeder hens and 440,000 breeder toms were carried into 1944.

Price Highest of Record: The average price received for turkeys sold alive in 1943 was 32.6 cents per pound -- the highest in 15 years of record, and 19 percent above the previous high price of 1942. Prices were at or only slightly below OPA ceilings all year because of the very great demand for turkey.

Cash Income Reaches All Time High: Cash income from sales of turkey in 1943 was \$160,938,000, -- the largest of record. Income was 11 percent above that of 1942 and about $2\frac{1}{2}$ times the 10-year average. California led all States in cash income from turkeys with \$20,819,000 in 1943, followed by Texas with \$14,966,000 and Minnesota with \$13,045,000. These three States -- with a large surplus production -- accounted for 30 percent of the United States income from turkeys last year.

1/ Prepared by E. Smith Kimball, Paul W. Smith, and Robert F. Moore, Agricultural Statisticians.
